## BINARY REALMS DATA.WARRIORS

2018 - MESMERIZE GAMES, GATO D.  
DISTRIBUTED UNDER A CREATIVE COMMONS V4.0 ATTRIBUTION-SHAREALIKE LICENSE.  
BINARY REALMS RULESET INCLUDED UNDER A GPL V3 LICENSE  
DOWNLOADED FROM [HTTPS://DATAWARS.GATO.DYZ/](https://DATAWARS.GATO.DYZ/)  
PROTOTYPE SAMPLE FOR TESTING PURPOSES

A wide, augmented, reality network allows citizens of THE METROPOLIS to aid on visualizing and interacting with information on a daily basis. And yet system also allows for clandestine, underground duels of DIGITAL WARRIORS that use their topic skills to craft custom BATTLE PROGRAMS and DEMONS to battle each other in digital, hack-and-slash DATA WARS! For some, it's just a dangerous hobby, but for others, though, it's more than just a game...

**A. FREE, NON-TRADEABLE, TURN BASED, STRATEGY CARD GAME**  
In this Starter Kit you'll find everything you need to play this card game. Included are a six-sided die, two Memory Monitors, two 30-card decks and this rulebook, that teaches you how to play the game.

### BEFORE YOU START PLAYING...

This Starter Kit includes two different decks:

- \***Power Drive**, a raw force-based set,
- \***Robot Control**, an invasion-type set.

These two decks are very different, and make use of different strategies to help you win. **Power Drive** is a beginner deck, with cards that are very easy to understand and deal direct damage to your opponents, while **Robot Control** is an advanced deck, with more involved cards, that focuses on sabotaging your opponent through card combos. Don't worry about choosing the "wrong" deck when you start playing! Understanding how you use card combinations in this game is very easy, and you'll quickly learn how to use your cards for your advantage strategically. However, if you have no experience playing card games, it's recommended that you start playing using the **Power Drive** deck.

### Check the included Dictionary for definitions on unsure words!

--name and (cost)

### YOU HAVE LOGGED IN SUCCESSFULLY...

A wide, augmented, reality network allows citizens of THE METROPOLIS to aid on visualizing and interacting with information on a daily basis. And yet system also allows for clandestine, underground duels of DIGITAL WARRIORS that use their topic skills to craft custom BATTLE PROGRAMS and DEMONS to battle each other in digital, hack-and-slash DATA WARS! For some, it's just a dangerous hobby, but for others, though, it's more than just a game...

### THIS IS YOUR DESKTOP

This is the field in which you'll play your cards. It's the drive from which you draw cards. The game is over for you if you have no cards remaining in your drive.

### 2. Your Trash Bin.

The cards that you own are discarded from the game are stored here.

### 3. Your Program Manager.

This is where .PRG cards and .CONF cards attached to them are in play. They can be in three states: loading, idle and running.

### 4. Your Daemon Bench.

This is where your .DAEMON cards can be loaded and kept in played.

### 5. Your Memory Monitor.

Each player has one assigned to them. You can see how many .Memory Points they have, and how many .Memory Points they have left.

### 6. Your Daemon.

Each player has one assigned to them. You can see how many .Memory Points they have, and how many .Memory Points they have left.

### FOUR KINDS OF CARDS

There are four kinds of cards with particular abilities and different rules that execute commands. Special abilities that use **Memory Points** to execute - either if the card itself contains commands available to them or if any card explicitly allows them to do so (i.e. a card that can execute commands via other cards in play), and can also have special **Card Effects** that affect the way the game, or certain cards work. PRG cards enter in game in **LOADING** state, and go into **IDLE** state on their next **MEMORY CLEANUP** step, from where you're able to issue commands via this card.

### THE CARDS

Every card in this game contains the following:

1. An unique **name** and **kind** of card indicated by both an icon and an extension appended to the name.
2. **Base Memory Cost**, indicating the amount of Memory Points the card needs to allocate in order to be put in play.
3. **Card Effects**, that change in some way the cards change functions.
4. **Card Commands**, indicated by their --name and (cost)

### PLAYING A MATCH

#### THE 5 STEPS OF EACH TURN

All players (referred as users) start with a 30 card deck, called drives in game, and 8 Memory Points, indicated on their **Memory Monitor** (included in the Starter Kit).

#### STEP #001 - INIT

The current user deallocates the **Memory Points** used by their cards, and sets all .PRG cards in play on their desktop.

#### STEP #002 - MEMORY CLEANUP

The current user deallocates the **Memory Points** used by their cards, and all .PRG cards in play on the current user's desktop are considered to be active.

#### STEP #003 - SETUP

During this step, the current user can play any kind of card on their desktop.

#### STEP #004 - RUN

At this point, the current user can issue commands from idle, PRG and .DAEMON cards in play, as long as have either control or ownership of the card, alongside .SCRIPT cards from their hand. During this step, other users can also execute commands, always starting from current user in a stack-like fashion (last commands to be executed are the first to be resolved).

#### STEP #005 - EXIT

At this point, the turn is over. If the current user has more than 5 cards in their hand, they must discard cards from their hand until they have just 5. If any user has no cards left in their hand, they are considered out of the game. The last user standing in game wins.

# BINARY REALMS™ DATA.WARRIORS

## Starter Kit

Prototype Sample, do not distribute!

**Includes:**  
Two 30-card decks  
Ruleset booklet  
+ all you need to play!

<http://datawars.gatod.xyz/>

Included in this Starter Kit is everything you need to start playing the free strategy card game Binary Realms Data Warriors right away with a friend!

Two decks with different cards, ready to play.

Binary Realms Data Warriors is a free, turn based strategy card game that you can print, cut and enjoy! Play with your friends in intense computer battles, hacking each other using executing commands, loading programs and daemons into your memory to delete each others' drives completely. Welcome to a new kind of card game!

## BINARY REALMS™ DATA.WARRIORS POWER DRIVE PLAY DECK

This is a playing deck with a highly offensive playstyle. Use your program and script cards to make your opponents discard their hand and deck. If you find yourself in trouble, this deck configuration also allows you to have an ace up your sleeve and clear your desktop and programs of unwanted cards.

This deck is great for beginners and people with no experience playing strategy card games. Most cards are very easy to understand, and its fast-paced gameplay makes it a good pick to start playing right away!

**Deck Contents**

- Program Cards
  - 2x - BrokerMan.PRG
  - 2x - KMAuler.PRG
  - 2x - vultur.PRG
  - 1x - GCMon.PRG
  - 1x - ArcMan.PRG

**Daemon Cards**

- 1x - vDoctor.DAEMON
- 1x - pgCOLL.DAEMON
- 1x - DDriver.DAEMON

**Script Cards**

- 2x - fileless SCRIPT
- 2x - Recycle SCRIPT
- 2x - bruteForce SCRIPT
- 2x - Sweeper SCRIPT
- 1x - Defrag SCRIPT
- 1x - zerofill SCRIPT
- 1x - f5freeze SCRIPT
- 1x - SysRec.SCRIPT
- 1x - RemoteSync.SCRIPT

**Config. Cards**

- 2x - SgtWally.CONF
- 1x - data-0.CONF
- 1x - rtkSaver.CONF
- 1x - DataCrubber.CONF
- 1x - cpKiller.CONF

## BINARY REALMS™ DATA.WARRIORS TOTAL CONTROL PLAY DECK

This deck is all about hacking your opponents' desktops, sneaking into their lines, sabotaging their free Memory Points and using their own power against themselves. Play a game of attrition, corner them and wait for openings to attack them!

This deck is great for people with previous experience playing strategy card games, or players with a less aggressive, more elegant style of play. Special rules are more involved on these cards and allow the players to go wild with card effects and commands.

**Deck Contents**

- Program Cards
  - 2x - hulvolt.PRG
  - 2x - ledchromer.PRG
  - 2x - THORSE.PRG
  - 1x - dLiz.PRG
  - 1x - PolyAgent.PRG
  - 1x - HVEye.PRG
  - 1x - rootkat.PRG
  - 1x - SoulSeeker.PRG

**Daemon Cards**

- 2x - ReSH.DAEMON
- 1x - Eppy.DAEMON

**Script Cards**

- 2x - fork.SCRIPT
- 2x - binSummon.SCRIPT
- 2x - FileFlare.SCRIPT
- 1x - reconf.SCRIPT
- 1x - memSkip.SCRIPT
- 1x - Daemon.SCRIPT

**Configuration Cards**

- 2x - fBomb.CONF
- 2x - DragDrop.CONF
- 1x - lPProxy.CONF
- 1x - zombity.CONF
- 1x - RootAccess.CONF
